

IVORY MEDIA / OWN CHANNEL PLAYBOOK

# Content strategy & brand system

The system we sell to clients, run on ourselves. Content pillars, a real topic bank, the competitor read, and the full visual identity, in one place for Nicole to build from.

---

|              |               |              |         |
|--------------|---------------|--------------|---------|
| DATE         | OWNER         | APPROVER     | VERSION |
| 15 July 2026 | Nicole Chavez | Steve Makari | V2      |

# Why this exists

We sell established businesses a done-for-you organic content system: strategy, filming, editing, posting, so they stop overpaying for ads and build a brand that generates leads on its own. Ivory Media isn't consistently running that system on itself. This fixes that.

700+

PROJECTS SINCE 2016

95%

REFERRAL RATE

200+

CLIENTS ACROSS AUSTRALIA

## THE OPENING NOBODY ELSE HAS TAKEN

Every competitor we've mapped in Sydney, Melbourne and Queensland has the same gap: **none of them run their own channel.**

30+ agencies mapped. Zero practise what they sell. Whoever proves the method on their own brand first wins the argument before the sales call even starts, and that's the job this document sets Nicole up to do.

## AUDIENCE

# Who we're talking to

The people we talk to on our own channels are the same people we sell OCS to. Every post is also a sales asset.

### PRIMARY DECISION-MAKER

Founders, CEOs and business owners of established service businesses. \$500K to \$5M+ revenue, 3+ staff, already spending on ads, 3 to 10+ years in business.

### SECONDARY CONTACT

Marketing and comms managers inside larger organisations, no in-house video, and their reputation is tied to what we deliver up the chain.

## INDUSTRIES

AGRICULTURE

MANUFACTURING

INDUSTRIAL

EDUCATION

GOVERNMENT

MEDICAL / HEALTH

CORPORATE / B2B

Matches the live site and the real client base: UNSW (education), CNH (agriculture), Obex (manufacturing), Blackwoods and Bullivants (industrial), Princeton Health and Cosmetic Connection (medical/health), SaCSA and the Department of Education (government). Not finance, not legal, no matter what an older doc says.

# Competitor landscape

Sydney/NSW deep dive 11 Jun 2026 + Market Penetration Strategy. Bluu Media House added 15 Jul 2026.

## Halcyon Agency

**HIGH**

Content OS / Conversion OS. One shoot a month, 12–15 shorts, 4 hrs of client time. Overlaps Ivory on education, medical and corporate/B2B.

**Soft: no published pricing, proof concentrated in property, not education or medical.**

## AM Visuals

**HIGH**

Strategy-first video marketing, published from-pricing, 70 five-star reviews. Overlaps Ivory via construction and healthcare.

**Soft: no named recurring system.**

## Bluu Media House

**MED-HIGH**

Gold Coast. Done-for-you strategy + monthly shoots + editing + posting for construction and industrial service businesses, \$3–30M revenue.

**Soft: newer entrant, hasn't landed in Sydney yet.**

## StoryStack

**HIGH (EDUCATION)**

Ex-Ivory Media employee. Education-only content agency targeting UNSW contacts directly, with productised offers (Story Sprint, Signature Story).

**Soft: solo operator, one sector, no results numbers or risk reversal.**

## BIGGEST GAP

TikTok is blank for nearly every competitor. Nobody runs their own channel the way they sell it to clients. No quantified proof exists in agriculture, industrial or manufacturing anywhere in the market.

Full deep dives: [references/competitor-research/](#) (Sydney/NSW, Melbourne, Queensland, Market Penetration Strategy) and [SecondBrain/research/storystack-competitor.md](#). Re-run quarterly.

# Content pillars

Three pillars, already locked in the ClickUp content system and the script library. Every idea gets assigned one of these on creation.

## E Educate

TARGET MIX 50%

Teaching content, frameworks, contrarian takes. Establishes Ivory as the strategy authority, not just a camera crew.

## C Connect

TARGET MIX 30%

Real behind the scenes: shoots, process, the crew. Shows how Ivory Media actually works, day to day.

## P Proof

TARGET MIX 20%

Client stories, results, case studies. Turns the 700+ project track record into content, not just a stat.

### PLATFORM DEFAULTS

Talking head (all pillars): Instagram, LinkedIn, TikTok  
VO + B-roll: Instagram, TikTok  
Carousel: Instagram, LinkedIn  
Blog: [ivorymedia.com.au](https://www.ivorymedia.com.au)

### SCRIPT LIBRARY STATUS

Locked and posted: E01-E13, C01-C06, P01-P04.  
**Next available: E14, C07, P05.**

# Educate

Starting ID: E14. Assign in order as Nicole scripts.

- |                                                                                                                |                                                                                                         |

- 01 A day in the life on a shoot day: call time to wrap, what actually happens.
- 02 Behind the scenes: how a discovery call turns into a filmed strategy.
- 03 Meet the crew: the contractor bench that shows up on every shoot.
- 04 What's on the truck: a look at the kit behind an Ivory shoot day.
- 05 Inside a batch day: how one shoot funds three months of content.

- 06 Brief versus final cut: what changes between the plan and what makes it to camera.
- 07 The edit bay: how a raw card of footage becomes a finished reel.
- 08 Building the AI Engine: what's actually running behind Ivory Media day to day.
- 09 A rainy shoot day: how the crew adapts when the plan changes on the spot.
- 10 Inside Shade: what client feedback looks like and how fast we turn it around.

- |                                                                                                    |                                                                                                |
|----------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------|
| <p>01 UNSW Gateway Program: the campaign behind a 4% enrolment increase.</p> <hr/>                 | <p>06 A client on why the credited, no lock-in deposit removed their risk.</p> <hr/>           |
| <p>02 CNH: four years, 35% YoY engagement growth, and the reel that hit 750K views.</p> <hr/>      | <p>07 Before and after: a dead Instagram profile versus a stacked one, side by side.</p> <hr/> |
| <p>03 NSW Department of Education: 50K+ views and a 28% lift in program page traffic.</p> <hr/>    | <p>08 The story behind "700+ projects since 2016."</p> <hr/>                                   |
| <p>04 Blackwoods: two campaign videos, 500K+ views each, and what changed on the ground.</p> <hr/> | <p>09 A round two story: how Q1 results changed the Q2 content plan for a client.</p> <hr/>    |
| <p>05 What happens after a client says yes to the \$1,500 strategy deposit.</p>                    | <p>10 Why a legacy client re-signed after their first quarter.</p>                             |

# Formats & cadence

## FORMAT TYPES

| FORMAT       | LENGTH                              |
|--------------|-------------------------------------|
| Talking head | 60–90 sec, teleprompter ready       |
| VO + B-roll  | 45–60 sec, B-roll markers in script |
| Carousel     | 5–7 slides, repurposed hook         |
| Blog article | 800–1200 words, cut from footage    |

## WEEKLY CADENCE (TARGET)

| DAY | CONTENT                     |
|-----|-----------------------------|
| Mon | Educate, Instagram + TikTok |
| Tue | Educate carousel, LinkedIn  |
| Wed | Connect, Instagram + TikTok |
| Fri | Proof, all three platforms  |

One shoot day should carry several weeks of posts. Nothing gets filmed twice: every script's blog angle and carousel hook are mapped at the same time it's written.

# Website & SEO plan

ivorymedia.com.au, Astro on Vercel. Ties to the live /grow/ landing pages.

The blog isn't a separate workstream. It's the repurposing output of the same scripts Nicole is already writing and filming, cut for search instead of scroll.

## PRIORITY VERTICALS

Agriculture, manufacturing, education, industrial: the four verticals already live as ad landing pages. One article per vertical per month is the floor.

## KEYWORD THEMES TO OWN

"Organic content system," "video content agency Sydney," and vertical terms like "video marketing for medical practices" or "agriculture content system." StoryStack already owns education-specific search, defend that ground directly.

## WHERE THE GAP IS

Regional NSW (Newcastle, Wollongong, Central Coast) has no strategy-led content player running SEO pages. Comparison and cost-guide content is unclaimed and high-intent.

## CADENCE

Two SEO articles a month minimum, each cut from footage already filmed. Every article links back to the matching /grow/ page and the relevant case study.

# How Nicole runs this

This is already built. Nicole doesn't need to invent a process, she needs to run the one that exists.

- |                                                                                                           |                                                                                                              |
|-----------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------|
| <b>01</b> Pick a <b>topic</b> from the topic banks, or a fresh idea, voice note or transcript from Steve. | <b>05</b> Create the <b>ClickUp</b> task in list OCS – 2026 Q3 (Ivory Media folder). Set every custom field. |
| <b>02</b> Assign an <b>ID</b> . Next available: E14, C07, P05. Never reuse one.                           | <b>06</b> <b>Film</b> , batching multiple scripts per shoot day where possible.                              |
| <b>03</b> Write the <b>script + caption</b> : hook (A/B/C/D), context, tension, insight, payoff.          | <b>07</b> <b>Edit + post</b> to Instagram, LinkedIn and TikTok per the platform defaults.                    |
| <b>04</b> Map the <b>repurposing</b> : blog angle + carousel hook, assigned at creation.                  | <b>08</b> Repurpose to the <b>blog</b> , linked to the matching /grow/ vertical page.                        |

Full detail lives in **ivory-media-content-engine**, **ivory-media-video-scripting**, **ivory-media-hook-frameworks** and **ivory-media-brand** skills. Read the brand skill before writing anything client or public-facing.

CARD

## THE 80/20 RULE

Neutrals dominate. One green moment per layout, not all of them screaming at once. Text on green is always near-black.

## GRADIENTS, ONE PER PIECE MAX

Button 135deg #6FCF4E to #3DA82F. Panel 155deg #6FCF4E to #237818. Never fuschia, violet, teal or blue.

# Typography

**Headline** 700 • sentence case

**Section  
title** 600

Body copy, sentence case, contractions on 400

**EYEBROW LABEL** Mono • uppercase • 0.16em

## HOST GROTESK

Headlines and body. Sentence case, never all-caps. Weights 400 (body), 600 (emphasis), 700 (headlines).

## JETBRAINS MONO

Eyebrows, labels, meta only. Uppercase, letterspaced. Never body copy, never a full sentence.

# Logo & layout

## LOGO RULES

Black wordmark/icon on light. Ivory wordmark/icon on dark.

**Known gap: no green logo variant exists yet**, flag to Steve if one's needed. The old fuschia icon is retired everywhere.

## LAYOUT FOR SOCIAL + WEB

Radii: 9px buttons, 12px chips, 18px large cards. Same 80/20 rule on Reels covers and carousel slides as on this document.

# Where everything **lives**

| WHAT                         | WHERE                                                                                        |
|------------------------------|----------------------------------------------------------------------------------------------|
| Fonts + logos (actual files) | templates/brand-documents/_Brand Assets/                                                     |
| Full web brand system        | projects/im-website/ivory-design-system/, mirrors stevenmakari/ivory-design-system on GitHub |
| Content engine skill         | .claude/skills/ivory-media-content-engine/SKILL.md                                           |
| Competitor research          | references/competitor-research/                                                              |
| Business facts (canonical)   | context/current-state.md                                                                     |

A ready-to-use copy of the fonts and logos is packaged alongside this PDF, and mirrored in ClickUp, so Nicole isn't hunting through the file system.

NEXT FOR NICOLE

# Run the system we sell. On **us.**

- 01 Start scripting from the topic banks. Next IDs: E14, C07, P05.
- 02 Create each script's ClickUp task with every custom field set.
- 03 Batch shoot days. One day of filming should carry several weeks of posts.
- 04 Cut two blog articles a month from footage already filmed.
